FALL BULBS—1925

WE take pleasure in presenting our ANNUAL BULB CATALOG for your early consideration. We have assurance from our Holland growers that the Bulbs shipped to us will all be first size and of quality equal to that supplied to us in former years.

We thank our numerous patrons and friends for their continued confidence in our goods, which has enabled us to be proud of their patronage, and we hope to still maintain the standard and quality of our bulbs in the future as in the past.

Our patrons will always find courteous treatment from our fellow-workers who have so greatly aided us in the expansion of our business.

BULBS FOR NATURALIZING

The importation of many bulbs will be prohibited after 1925. We would strongly advise lovers of the beautiful Spring flowers to procure their supplies of bulbs this year.

The following bulbous plants are best adapted for naturalization: **CHIONODOXA, CROCUS, ERANTHIS, FRITILLARIAS, GRAPE HYACINTHS, NARCISSUS, SCILLAS** and **SNOWDROPS**.

A full description of the above varieties will be found in this catalogue.

Marshall's Matchless Darwin Tulips

Darwin Tulips are highly recommended for massing in shrubbery and for providing contrasting colors in the Spring garden. In form, the blooms are entirely distinct from all other classes of Tulips; they are unusually large and are borne on long stems. They may be forced if brought to the heat not earlier than January.

Marshall's Single Early Tulips

Tulips for bedding are the most popular and effective of all hardy, bulbous plants. In our descriptions we give the color and average height to which they grow. For pot culture and forcing for Winter cut flowers they are invaluable.

For outdoor planting, 4 inches to the bottom of the bulb is deep enough, and a distance of 5 to 6 inches between the bulbs is sufficient. They may be planted in October and November, before the ground freezes. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pot should be buried until the bulbs are well rooted.

A, B, and C indicate season for flowering. A and B may be planted to flower about the same time in the open ground; C flowers later. The figures indicate average height in inches.

Hyacinth La Grandesse

Single Narcissus and Daffodils

Daffodils will continue to increase every year, and, when naturalized on the lawn, in meadows, or in orchards, they will form great colonies. They are invaluable for planting among shrubs and in the hardy border, and especially among the Peonies, their golden cups making a beautiful contrast with the bright red Peony shoots coming out of the ground.

German Irises thrive in a well drained and sunny situation and the finest blooms are obtained from established clumps, consequently when planted they should remain undisturbed for at least five or six years. The plants may be given a light covering of leaves or salt hay (not manure) during Winter. When transplanting barely cover the rhizomes.

Roots are ready for shipment in September to November.

Lily of the Valley

For forcing, the pips are to be preferred, being grown under conditions tending to promote vigorous and early blooming. Twelve to eighteen pips may be planted in a 6-inch pot, with all the fibrous roots carefully preserved, and keeping the crowns above the soil. Place them in a temperature of about 80 degrees, cover the crowns with loose moss and keep them constantly moist with tepid water.

Marshall's Matchless Pips. The earliest, largest and best for forcing. Extra strong pips with long roots producing flowers with 15 to 20 bells and fine foliage. \$5.50 per 100, \$50.00 per 1000.

COLD STORAGE LILY of the VALLEY

We have at all seasons a supply of pips packed in cases of 250 and 500 for shipment as required.

Cold Storage Matchless Pips. 250 \$15.00, 500 \$28.00, 1000 \$55.00.

Lycoris purpurea

An introduction from Japan, but now very scarce. The foliage is produced in Spring and ripens up in August, after which the flower stalks appear, producing flowers in clusters of 6 and 8 flowers of 6 petals each. The bud is wine-color changing to royal purple when expended, giving a startling and beautiful effect. Perfectly hardy. 2 feet high.

Strong flowering bulbs, each \$1.00, doz. \$10.00, 100 \$75.00.

Pot-Grown Strawberry Plants

For Summer and Fall Delivery

The best time to plant pot-grown Strawberries is during the months of June, July and early part of September. They have the great advantage over "layer" plants of producing a crop of the largest and finest berries the first season after planting. Further than this, they may be safely planted in the hottest and driest weather without serious check to growth, and may be planted where early Potatoes, Peas or other early crops have been harvested.

All varieties of Strawberries give the greatest yield and the largest berries when grown in rich soil, hence no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal application of well-rotted manure.

Extra Early Varieties

	Doz.	100
Campbell's Early. A splendid, strong grower, producing very large crops of most attractive, rich red berries of high quality.....	\$1.20	\$7.00
Charles I. Extra early, being one of the very first varieties to mature fruit. A big cropper of evenly shaped, well-colored berries. Because of its extra heavy root system, will withstand drought better than almost any variety.....	1.25	8.00
Premier. A vigorous grower, doing well on all types of soil. The plants are enormously productive, commencing very early and bearing through a long season. The berries are beautiful in appearance, having a glossy, rich red color, and are delicious in quality.....	1.20	7.00
Success. This berry is an excellent variety with large and uniform berries of bright scarlet color.....	1.20	7.00

Medium Early Varieties

	Doz.	100

John H. Cook. The berries are nearly round in shape, of excellent quality, blood red in color and very firm. An enormous cropper with delicious flavor.....	1.25	8.00
Senator Dunlap. This variety does well on almost any soil. It is a large cropper with firm berries of good flavor.....	1.20	7.00

Midseason Varieties

	Doz.	100
Brandywine. An old variety but still popular. The plants produce large, bright crimson berries of good flavor. For best results it requires deep rich soil.....	\$1.20	\$7.00
Bushel Basket. This is a veritable giant and is creating a genuine sensation. It is an immense plant and the fruit, though unusually large, is freely produced and of fine quality.....	1.25	8.00
Delicious. A medium late to late variety, producing enormous crops of berries that are truly delicious, and of very attractive appearance.....	1.25	8.00
Eaton. Of remarkable size, excellent in color, of superior flavor, and possesses every characteristic to make it one of the really worth while Strawberries introduced of late. It yields large berries in greatest profusion and their dark red color easily makes them one of the most desirable for canning.....	1.25	8.00
Edmund Wilson (The Giant Strawberry). This variety produces the largest fruit of any Strawberry in existence. The berries are of a very dark color, are bluntly heart-shaped, and are as large as small apples.....	1.25	8.00
Glen Mary. Wonderfully high quality and great productivity are the laudable qualities of this berry; it is also a fine strong grower, and among the most prolific....	1.20	7.00
Howard No. 17. The plants of this variety are strong and vigorous. They keep green and healthy after yielding the largest crop. The berries are large and beautiful and of the highest quality.....	1.20	7.00

STRAWBERRY PLANTS—Continued

	Doz.	100
Hundred Dollar. This plant is a strong, vigorous grower and among the most prolific. The berries average very large indeed. The color is bright scarlet and the quality mild, sweet and luscious....	\$1.20	\$7.00
Joe. This most valuable berry succeeds on most any soil and under all conditions; bears very large, beautiful berries from midseason to late, and is one of the best in flavor.....	1.20	7.00
Judith. The large, well-flavored fruit maintains its size uniformly throughout the season. The deep red berries are large, pointed in shape, and of a deep red color throughout.....	1.25	8.00
McKinley. Pre-eminently a variety for the home garden. The berries are large, handsome and freely produced on strong growing plants.....	1.20	7.00
Marshall. Though an old berry, Marshall has lost none of its popularity. Requires good, fertile soil and high culture. One of the best varieties for forcing under glass.....	1.20	7.00
New York. A vigorous grower. Quite productive, with large, dark red berries. It is one of the sweetest berries grown and very popular.....	1.20	7.00
Nick Ohmer. This splendid old variety produces extra large fruit of superior quality. A good variety for forcing under glass.....	1.20	7.00
Royal Sovereign. The flesh is firm and white. The flavor is rich and vinous. The best variety in existence for forcing under glass.....	2.00	12.00
St. Martin. A very large berry which retains its size right through the season. It is of splendid shape and color and may rightly be called Perfection.....	1.25	8.00

Strawberry Chesapeake

Late Varieties

	Doz.	100
Chesapeake. This variety requires high culture upon clay loam, where it is a wonderful berry. The color is bright crimson and the flesh firm and of good quality.....	\$1.25	\$8.00
Gandy. An old and popular variety. The texture is of the firmest and the color a bright flame. After picking, the bright color remains until decay. The berries are very large. Sub-acid in flavor.....	1.20	7.00
Pearl. The latest of all to ripen. The light scarlet berries are somewhat irregular in form, but of extra size and superior quality.....	1.25	8.00
Steven's Late Champion. Similar to Gandy but later. Berries are irregular in shape but are freely produced.....	1.20	7.00
William Belt. A vigorous grower that succeeds in any soil. The berries are deep crimson in color and of very large size and of the highest quality.....	1.20	7.00

Ever-bearing Varieties

	Doz.	100
All Season. We truly believe this is the most valuable Strawberry ever offered. It bears large quantities right through the Summer and Fall, the Fall crop being greater by far than that of any of the other ever-bearing varieties. We know of no other variety that will produce the crop of fruit during the hot dry months which this sort does, while in size, the individual berry equals the best of the June varieties.....	\$3.00	\$20.00
Francis. The plants of this variety are vigorous growers, healthy and very prolific and the fruit is of fair size and of excellent quality.....	1.25	8.00
Ideal. This is a most promising variety of recent introduction. In vigor and size of plant it is a decided improvement upon the older varieties. Large berries.....	1.40	9.00
Progressive. A variety of widespread popularity. Each year it produces two large crops. Berries are smooth, uniform in size; deep crimson and of good quality.....	1.25	8.00

Planting Table for Beds of Bulbs

A circular bed 6 feet in diameter, with bulbs 6 inches apart, requires 110 bulbs; 5 inches apart, requires 160 bulbs; 4 inches apart, requires 300 bulbs.

Depth at Which Bulbs Should be Planted

Many of our customers are frequently puzzled to know the proper depth and distance apart at which bulbs should be planted. The accompanying diagram, reproduced from **Popular Gardening**, conveys the information much more clearly and briefly than we could describe it. The chart will bear careful study. **Outdoor planting should be done early in the Fall** to secure healthy plants, vigorous foliage and beautiful flowers.

Marshall's Lawn Grass Seed Marshall's Special Lawn Grass Mixture

Marshall's Special Lawn Grass Seed produces a perfect and enduring lawn of luxurious richness, with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of inter-weaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

Price: Lb. 60c., 5 lbs. \$2.75, 20 lbs. \$10.00, 100 lbs. \$50.00.

Rye, Winter

For grain, 1 bushel to the acre; for forage or soiling, 1½ bushels, 56 lbs. to the bushel. **Giant Winter.** This variety is fast gaining in popularity as a cover crop. If allowed to mature will produce a heavy crop of grain, and a fine quality of straw if cut about July 1. **New Rosen.** A four-row Winter variety introduced in Michigan.

Wheat, Winter

The seed wheat we offer is grown in Pennsylvania by a very reliable grower, especially for seed purposes. Sow 1½ bushels to the acre.

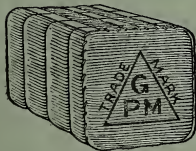

Golden Wave. A grand large red grain, bearded variety. **Pennsylvania 44.** A bearded, large red variety originated at the Pennsylvania State College Experiment Station some years ago. **Red Wave.** Has long, well-filled heads and large, heavy red grain. The heads are beardless.

Price: Lb. 30c., 100 lbs. \$20.00. Use 30 to 50 lbs. per acre.

Winter Vetch (Vicia Villosa)

Recommended for Fall sowing with Rye. A valuable food for stock in early Spring. Use 30 to 50 lbs. per acre. Lb. 30c., 100 lbs. \$20.00.

Peat Moss. Torf Mull

Granulated Peat Moss should be used liberally about the garden, greenhouse, for pot plants, window boxes and growing bulbs, etc.

It is also useful for mulching perennial beds, lawns, Roses, Strawberry beds and mixing with sandy or clayey soils.

Small bale, enough to cover 16 sq. ft. 1 in. deep.

Large bale, 13 cu. ft., covers 240 sq. ft. 1 in. deep.
